

**AEMA/OFC Summit
AFRRCS Update
November 25, 2014**

What is AFRRCS?

- It has nothing to do with the duck!

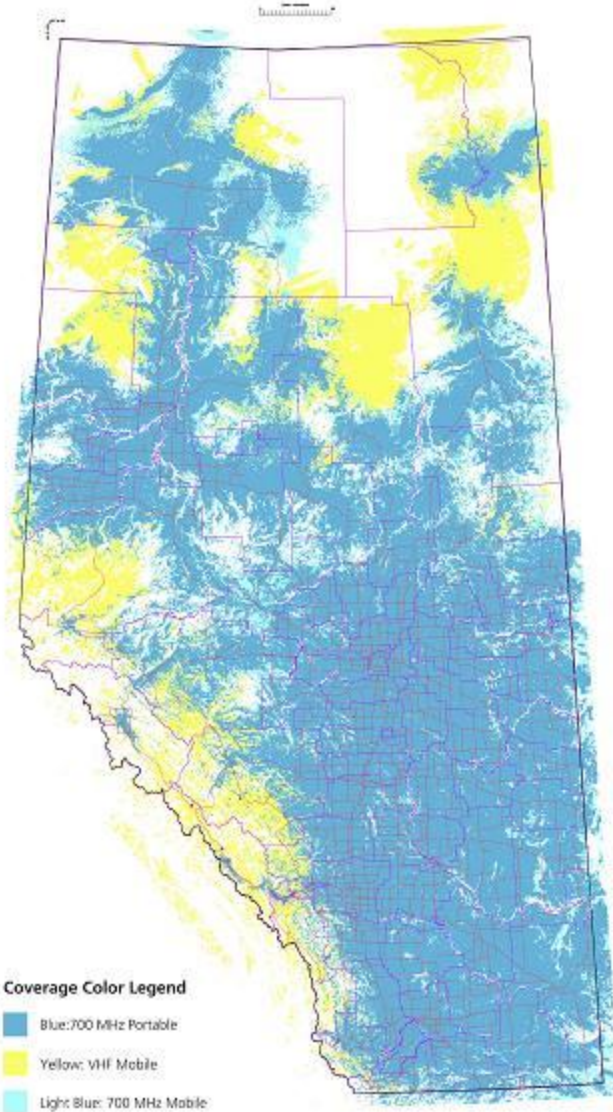

Background

- Alberta First Responders Radio Communications System
- AFRRCS Objectives
 - Provide 2 way voice public safety grade radio solution
 - Improve safety of all Albertans
 - Improve safety of first response officers
 - Available to all first responders
 - Enable interoperability
 - No system fees for municipal first responders

Proposed Coverage

- Primarily 700MHz trunked P25 portable coverage
- Provincial and Federal zones to be addressed by VHF conventional P25 systems

Coverage & Costs

- Partly based on 2007/10 user requirements
 - 95% mobile outdoor coverage of all primary and secondary roads
 - 95% portable outdoor coverage in 102 named communities
 - 95% portable outdoor coverage in 7 urban communities; Edmonton, Grand Prairie, Fort McMurray, Red Deer, Calgary, Lethbridge and Medicine Hat
- End-user equipment and in-building coverage extenders are the responsibility of user agencies

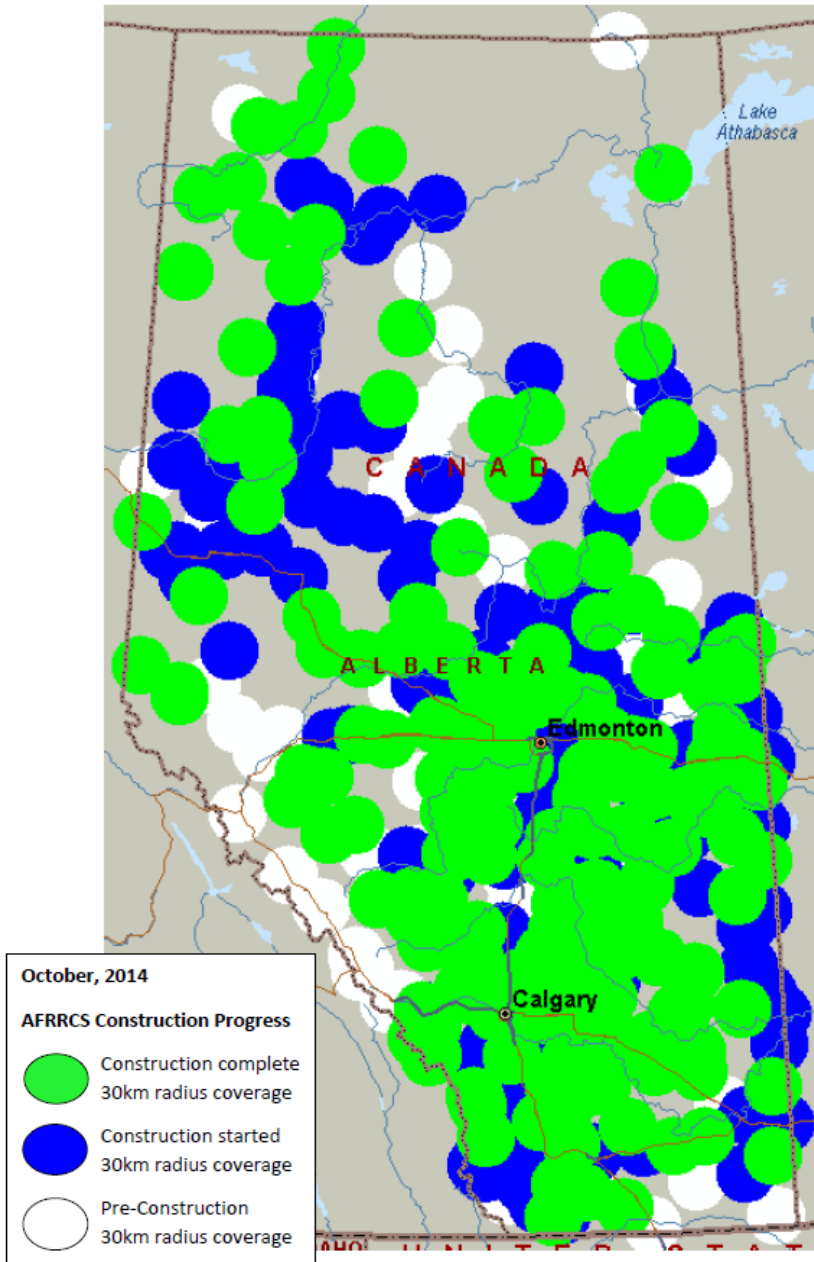

Current Status (October 31)

- 321 out of 332 sites have been secured
- Construction is ready to start or underway at 105 sites and is completed at 161 sites
- 94 sites are live
- Interim operations & maintenance services commenced April 1
- Worked with Industry Canada to secure Air to Ground 700 MHz frequencies up to 10,000'

Current Status (October 31)

October, 2014 – Construction complete 161 ; Construction Started 105 ; Pre-Construction 66

AFRRCS Sites

Resiliency

- System designed for 99.999 availability
- Two switching centers (Calgary and Edmonton)
 - Live backup switches
 - Redundant fiber connections via multiple providers
- Excluding disadvantaged sites:
 - Backup power supply plus four hours of batteries
 - Two backhaul methods
- Inventory of system spares
- Long-term, technical support located in multiple areas of Alberta

More AFRRCS Sites

The Plan

- All AFRRCS sites will be live by the end of June 2016
- Interoperability gateways will be used to tie AFRRCS with existing radio systems during an agency migration
- The GoA will be responsible for future system expansion due to:
 - Increasing volume of first responders
 - Increasing population
 - New primary and secondary roads
- Investments will be prioritized by AFRRCS Governance

AFRRCS Governance

- Governance Council includes representatives from:
 - Calgary and Edmonton Fire
 - Calgary and Edmonton Police
 - RCMP K Division
 - Alberta Health Services
 - Alberta Fire Chiefs Association
 - Alberta Emergency Management Agency
 - GoA (Public Security & Information Management and Technology Services)

AFRRCS Governance

- Interoperability & Standards Council report to the Governance Council
 - Actively working to provide governance with rules regarding use for shared system
 - Three working groups have been established to work on encryption, consoles and voice logging recorders

What About Broadband Data?

- No funding or plan in place
- Minister has communicated an approximate cost (\$250M)
- Doesn't mean AFRRCS isn't thinking about it
 - Current system is designed to be upgradable
 - November 24 to 26 – CAUSE III
 - Alberta/Saskatchewan/US Interoperability
 - Includes integration with broadband data

System Users

- RCMP K Division
- Government of Alberta
 - Commercial Vehicle Enforcement
 - Conservation Officers
 - Correctional Services
 - Fish & Wildlife Enforcement
 - Sheriffs
- Alberta Health Services
- City of Edmonton
- Calgary Fire Department

System Users

- Unsolicited approaches from many counties, municipal districts, towns and first responder agencies:
 - Cardston County
 - High River Fire Department
 - Lethbridge County Fire Departments
 - Mackenzie County
 - Okotoks Peace Officers
 - St. Paul Region
 - Spruce Grove

Agency Migrations

- Usage is Voluntary
- Each agency determines pace and timing
- Standard process/templates to follow
- Governance approves all migration plans
- Agency requirements drive selection & price
 - Multi-vendor accessible system
 - Radios as low as \$1,200
 - Government contracts in place
 - Edmonton lab available for testing/selection

Permitted Radios

EF Johnson	5100ES, 5300ES
Harris	XG100, XG75, XM100, P7300 series, M7300 series
Kenwood	TK-5220, TK-5210, TK- 5710, TK-5720, TK-5410, TK-5910
Motorola	APX4000, APX6000, APX6500, APX7000, APX7500, XTS Series XTL Series
RELM	KNG P/M 150
TAIT	TP/TM 9100 Series

Agency Migration Costs

- Costs Agencies are responsible for include:
 - Staff, training, procurement, in-building coverage
 - Radios and dispatch connections (vehicles, portables, consoles, KMF)
 - Managing equipment and processes
- AFRRCS responsible for infrastructure costs capital and operating
 - Towers and supporting infrastructure
 - No system fee for municipal first responder use of the system

Secondary Responders

- Governance supports migration of secondary responder users
 - But only when the time is right i.e. following first responders as per Industry Canada rules and without adding risk to first responders
 - Needs assessment and business case still required
 - Municipality responsible for all incremental costs
 - Annual charge for each secondary responder radio on the system
 - Opportunity to review who needs a radio

AFRRCS Role in an Emergency

- Public safety grade solution
 - Designed for 99.999% availability
- Enables agency interoperability
- Over 500 portable radios
- Mobile radio sites (Sites On Wheels)

Mobile Radio Sites

- AFRRCS has two mobile radio sites
- They have been successfully deployed at two emergencies and multiple planned events
- Each site has 4 channels
- They can be towed or flown in via helicopter
- 85' telescopic mast can provide 8-9km radius of portable coverage
- Satellite backhaul

Mobile Radio Sites

- Four different reasons for use:
 - Emergency, directed by AEMA
 - AFRRCS coverage site extended outage
 - Major event e.g. Commonwealth Games
 - Training exercise
- The AFRRCS team currently supports the mobile radio sites, long-term support will be determined as part of long-term support and maintenance planning

For More Information

- General AFRRCS information, presentations etc. please contact:
 - Stephen Bull – Executive Director
 - Stephen.Bull@gov.ab.ca
- To request the templates that are used to assist with migration planning please contact:
 - Curtis Brochu – Director of Transformation
 - Curtis.Brochu@gov.ab.ca
